

Senatla Ops

Requirements Confirmation Workbook

Prepared for Mr Rubin Thoso to confirm field names, workflows, responsibilities, controls and pilot information.

VERSION	1.0
DATE	23 June 2026
STATUS	Controlled release baseline
CLASSIFICATION	Confidential - internal use

Prepared by Sankofa Digital Studio for Senatla Trading

Table of contents

How to use this workbook	4
1. Business structure and ownership	4
Proposed organization object	4
Decisions required	4
2. Sites, projects and operating locations	4
Proposed site object	5
Decisions required	5
3. Users, roles and authority	5
Proposed user object	5
Role confirmation	6
Decisions required	6
4. Employees and workforce records	6
Proposed employee object	6
Decisions required	7
5. Attendance, safety talks and daily synchronization	7
Proposed attendance record	7
Proposed safety-talk record	8
Proposed daily synchronization record	8
Decisions required	8
6. Issues, exceptions and escalation	8
Proposed issue object	8
Decisions required	9
7. Payroll and financial controls	9
Proposed payroll objects	9
Decisions required	9
8. Asset register and identity	10
Proposed asset object	10
Identity decisions required	10
9. Custody, compliance and meter records	11
Proposed custody transfer	11
Proposed compliance record	11
Proposed meter reading	11
Decisions required	11
10. Inspections, defects and maintenance	12

Proposed pre-start inspection	12
Proposed defect and work order	12
Proposed maintenance plan	12
Decisions required	13
11. Approvals, audit and evidence	13
Proposed approval object	13
Proposed audit event	13
Decisions required	14
12. Privacy, offline use and notifications	14
Decisions required	14
13. Reports, dashboards and management questions	14
Decisions required	15
14. Imports, integrations and migration	15
Information required	16
15. Pilot, training and acceptance	16
Recommended success measures	16
16. Final client feedback	16
Most important outcome Senatla Ops must achieve	16
Features or workflows that do not match Senatla Trading	16
Missing information, roles or processes	17
Risks or concerns before the pilot	17
Review confirmation	17

Prepared for: Mr Rubin Thoso, Senatla Trading **Prepared by:** Sankofa Digital Studio **Version:** 1.0 **Date:** 23 June 2026
Status: Client review and requirements confirmation **Classification:** Confidential

How to use this workbook

This workbook exposes the proposed information objects, field names and operating rules behind Senatla Ops. Please mark each item as **Confirm**, **Change**, **Not needed** or **Later**, and add wording or examples where the proposed definition does not match Senatla Trading's practice.

The objective is not to approve technical implementation. It is to confirm what Senatla calls things, who owns the information, which fields are mandatory, who may see or change them, and which decisions require independent approval.

Review result	Meaning
Confirm	Proposed field or rule is correct
Change	Keep the capability but revise its name, values or workflow
Not needed	Exclude it from the current product
Later	Useful, but defer it to a later phase

1. Business structure and ownership

Proposed organization object

Proposed field	Purpose	Client confirmation or correction
Legal owner name	Current assumption: Senatla Trading	
Trading name	Name displayed in the application	
Registration number	Company/legal reference if required	
Department	Functional label such as Engineering; not a separate owner yet	
Operating region	Province, district or internal region	
Default currency	Current assumption: South African rand	
Time zone	Current assumption: Africa/Johannesburg	
Active status	Prevents use without deleting history	

Decisions required

- Confirm whether any assets, employees or sites belong to another legal entity.
- Confirm whether Engineering should remain a functional label for the first release.
- List the exact company names that may appear on reports or exports.
- Identify the Senatla executive who owns final data-policy decisions.

Client notes: _____

2. Sites, projects and operating locations

Proposed site object

Proposed field	Purpose	Client confirmation or correction
Site name	Human-readable operating location	
Site code	Short unique reference used in reports and imports	
Site type	Yard, project, mine, plant, office, workshop or other	
Physical address	Official location description	
GPS coordinates	Optional location verification and navigation	
Client/project name	External client or contract associated with the site	
Contract number	Optional commercial reference	
Start and end dates	Project lifecycle	
Site manager	Person responsible for daily submission	
Backup manager	Person who acts when the manager is unavailable	
Working days	Normal operating calendar	
Daily cut-off time	Determines on-time, late and rollover submission	
Active/archive status	Preserves history after closure	

Decisions required

- Provide the initial pilot-site list, exact spellings and site codes.
- Confirm whether projects and physical sites are the same object or must be separate.
- Confirm whether GPS evidence is required, optional or prohibited.
- Define daily synchronization cut-off times and weekend/public-holiday rules.

Pilot sites: _____

3. Users, roles and authority

Proposed user object

Proposed field	Purpose	Client confirmation or correction
Full name	Display and audit identity	
Email/username	Sign-in identity	
Mobile number	Recovery or notification contact	

Proposed field	Purpose	Client confirmation or correction
Role	Site Manager, Office Administrator or Director	
Functional team	Operations, Engineering, Finance or leadership	
Assigned sites	Limits operational responsibility	
Approval authority	Types and values the user may approve	
Active/suspended status	Immediately removes effective access	
Start/end access dates	Temporary or contractor access	

Role confirmation

Capability	Site Manager	Office Administrator	Director/Reviewer	Client correction
Capture site day	Yes	Review	Read	
Manage employees/sites	No	Yes	Read	
View payroll details	No	Yes	Confirm scope	
Manage assets and work orders	Proposed: limited field capture	Yes	Read	
Approve own request	Never	Never	Never	
Export unmasked identifiers	No	Request only	Assigned approval	

Decisions required

- Name the initial users and their exact roles.
- Identify independent reviewers for payroll, suspension and return-to-service decisions.
- Confirm whether Engineering requires a separate role in the pilot.
- Confirm password, session timeout and account-recovery expectations.

4. Employees and workforce records

Proposed employee object

Proposed field	Purpose	Client confirmation or correction
Employee number	Preferred internal unique reference	
First name and surname	Official employee identity	
ID/passport number	Sensitive identity field; masked by default	

Proposed field	Purpose	Client confirmation or correction
Tax reference	Payroll requirement if applicable	
Job title/role	Operator, Driver, Foreman, Safety Rep or other	
Employment type	Permanent, fixed-term, casual or contractor	
Start/end dates	Employment lifecycle	
Assigned site	Current primary work location	
Work group/team	Bulk attendance and assignment	
Basic rate	Payroll calculation input	
Allowances/deductions	Configured financial items	
Status	Active, suspended, inactive or archived	
Emergency contact	Confirm whether required and who may see it	

Decisions required

- Provide the official employee spreadsheet headings currently used.
- Confirm the preferred employee unique identifier.
- Confirm which personal fields are essential and their retention period.
- Provide the complete job-role and employment-type lists.
- Identify who may view full ID numbers and payroll rates.

5. Attendance, safety talks and daily synchronization

Proposed attendance record

Proposed field	Purpose	Client confirmation or correction
Employee	Person being recorded	
Work date	Date of the shift	
Status	Present, absent or pending	
Absence reason	Sick, family, AWOL, confirm in office or client list	
Comment	Context required by policy	
Evidence	Optional photo/document with purpose control	
Captured by/time	Audit evidence	
Correction reason	Required if an official record changes	

Proposed safety-talk record

Proposed field	Purpose	Client confirmation or correction
Topic and version	Exact talk delivered	
Site/date/time	Context of delivery	
Delivered by	Responsible person	
Attendees	People covered	
Notes/evidence	Proof required by policy	
Signature/acknowledgement	Confirmation method	

Proposed daily synchronization record

Proposed field	Purpose	Client confirmation or correction
Site and work date	Submission scope	
Attendance summary	Present, absent, pending and flagged totals	
Safety completion	Required talk/evidence status	
Pre-start completion	Required equipment checks	
Open exceptions	Items preventing clean completion	
Submission status	On time, late, critical or rollover	
Late acknowledgement	Reason and responsible user	
Signature	Submission confirmation	
Idempotency reference	Prevents duplicate offline submission	

Decisions required

- Confirm attendance statuses and absence reasons.
- Confirm whether photos, signatures and location are mandatory, optional or not allowed.
- Define who may correct attendance after submission and how approval works.
- Define late, critical and rollover timing rules.
- Confirm whether a daily sync may proceed with unresolved exceptions.

6. Issues, exceptions and escalation

Proposed issue object

Proposed field	Purpose	Client confirmation or correction
Category	Safety, Payroll, Discipline, Operations or client list	
Severity	Low, medium, high or critical	

Proposed field	Purpose	Client confirmation or correction
Site/asset/employee link	Record affected by the issue	
Description	Problem statement without unnecessary personal data	
Reported by/time	Attribution	
Owner	Person responsible for resolution	
Due date/SLA	Expected response time	
Status	Open, escalated or resolved	
Evidence	Supporting private files	
Resolution and history	Complete trace	

Decisions required

- Confirm categories, severity meanings and response targets.
- Identify which issues automatically escalate and to whom.
- Confirm whether disciplinary matters require a restricted view.
- Define what constitutes resolution and who may close each category.

7. Payroll and financial controls

Proposed payroll objects

Proposed field or rule	Purpose	Client confirmation or correction
Payroll period	Month/year and open, locked or exported status	
Basic rate	Approved employee rate	
Attendance basis	Days/hours included in calculation	
Allowance types	Travel, housing or client-defined values	
Deduction types	Advance, absence or client-defined values	
Manual adjustment	Amount, reason, maker and reviewer	
Masked export	Default operational export	
Full-ID export	Requires separate approval	
Export history	File, period, requester and time	
Locked-period rule	Completed period cannot reopen	

Decisions required

- Provide current payroll calculations, spreadsheets and rounding rules.

- Confirm working-day, overtime, absence and public-holiday treatment.
- Provide the full allowance and deduction catalogue.
- Confirm who locks periods and who approves full-ID exports.
- Confirm whether Senatla Ops calculates payroll or only prepares verified inputs.

8. Asset register and identity

Proposed asset object

Proposed field	Purpose	Client confirmation or correction
Asset number	Optional Senatla internal reference	
Serial number	Manufacturer/equipment unique identifier	
VIN/chassis number	Vehicle identity where applicable	
Registration plate	Road-vehicle identifier where applicable	
QR code	Lookup convenience; not authoritative identity	
Asset class	Excavator, truck, generator, tool or client list	
Make/model/year	Equipment description	
Ownership	Senatla-owned, financed, leased or hired	
Supplier/finance reference	Commercial trace if required	
Current site	Physical operating location	
Custodian/operator	Accountable person or team	
Lifecycle state	Active, maintenance, retired or disposed	
Acquisition date/cost	Cost and replacement analysis	
Replacement value	Planning input	
Notes and documents	Controlled dossier evidence	
Parent asset	Attachment or component relationship	

Identity decisions required

- Confirm whether **one or a combination** of serial, VIN and registration plate is mandatory by asset class.
- Confirm the preferred Senatla asset-number format.
- Provide the complete asset-class and ownership-type lists.
- Confirm how trailers, attachments, tools and components relate to parent equipment.
- Provide the controlled pilot asset list and source spreadsheet headings.

9. Custody, compliance and meter records

Proposed custody transfer

Proposed field	Purpose	Client confirmation or correction
From/to site	Movement history	
From/to custodian	Accountability handover	
Transfer date/time	Effective movement time	
Condition at handover	Damage/condition acknowledgement	
Meter at handover	Usage reference	
Accepted by	Receiving acknowledgement	
Notes/evidence	Photos or documents	

Proposed compliance record

Proposed field	Purpose	Client confirmation or correction
Type	Licence, roadworthy, insurance, certification, warranty or other	
Reference number	Document/certificate reference	
Issue and expiry dates	Compliance period	
Status	Valid, due, expired or waived	
Issuer/provider	Source organization	
Private document	Controlled evidence	
Reminder period	Days before expiry	

Proposed meter reading

Proposed field	Purpose	Client confirmation or correction
Meter type	Odometer km, engine hours or cycles	
Reading	Non-decreasing measured value	
Recorded date/time	Measurement time	
Source	Manual, import or future telematics	
Recorded by	Attribution	
Evidence	Optional meter photo	

Decisions required

- Confirm who may transfer custody and whether both parties must accept.

- Provide compliance types and reminder periods by asset class.
- Confirm which meter types apply to each asset class.
- Define how incorrect meter readings are corrected without deleting history.

10. Inspections, defects and maintenance

Proposed pre-start inspection

Proposed field	Purpose	Client confirmation or correction
Template and version	Checklist for the asset class	
Asset/operator/site	Inspection context	
Date/time and meter	Operational evidence	
Checklist response	Pass, fail or not applicable	
Comment/evidence	Required for failed items	
Overall result	Safe, attention or critical	
Signature	Operator acknowledgement	

Proposed defect and work order

Proposed field	Purpose	Client confirmation or correction
Defect category	Mechanical, electrical, hydraulic, safety or client list	
Priority	Low, medium, high or critical	
Safety block	Prevents use until cleared	
Work required	Clear task description	
Assigned technician/provider	Responsible party	
Planned/due dates	Schedule	
Status	Open, in progress, blocked, completed or cancelled	
Labour/parts/external cost	Total repair cost	
Downtime	Availability impact	
Completion evidence	Work, parts, documents and signature	
Return-to-service request	Maker request after blockers close	
Independent reviewer	Different person approves safe return	

Proposed maintenance plan

Proposed field	Purpose	Client confirmation or correction
Plan name/template	Standard maintenance activity	
Trigger	Date, engine hours, km or cycles	
Interval	Frequency	
Next due	Calculated due point	
Grace/tolerance	Escalation threshold	
Required evidence	Checklist, parts or certificate	

Decisions required

- Provide current pre-start and service checklists by asset class.
- Define which failed checks automatically create critical defects.
- Confirm who may declare an asset unsafe and who may return it to service.
- Provide maintenance intervals and current supplier/service arrangements.
- Confirm required cost, downtime, labour and parts detail.

11. Approvals, audit and evidence

Proposed approval object

Proposed field	Purpose	Client confirmation or correction
Request type	Suspension, full-ID export, return to service or client list	
Requested by/time	Maker evidence	
Reason and linked records	Decision context	
Reviewer	Checker; must differ from requester	
Decision	Approved or rejected	
Decision notes/time	Rationale	
Executed status	Confirms approved action completed	

Proposed audit event

Proposed field	Purpose	Client confirmation or correction
Actor and role	Who performed the action	
Date/time	When it occurred	
Action	What changed or was requested	
Record type and ID	Object affected	
Organization/site	Business context	

Proposed field	Purpose	Client confirmation or correction
Before/after summary	Material change evidence where appropriate	
Correlation/idempotency reference	Links retries and related actions	

Decisions required

- Confirm every action requiring maker-checker approval.
- Define reviewer authority limits and escalation routes.
- Confirm audit-retention period and who may export audit evidence.
- Confirm evidence types, maximum file sizes and document-retention periods.

12. Privacy, offline use and notifications

Topic	Proposed approach	Client confirmation or correction
Personal data	Collect only fields required for an approved purpose	
ID numbers	Mask by default; full view/export controlled	
Photos	Private storage; no public links	
Location	Collect only when policy requires it	
Retention	Rule by evidence and record type	
Offline queue	Visible pending/failed state; no silent deletion	
Duplicate prevention	Client-generated idempotency key	
Conflict handling	Human-readable conflict and controlled correction	
Notifications	Severity and role-based preferences	
Escalation	Trigger only after defined unresolved thresholds	

Decisions required

- Confirm devices, network conditions and expected offline duration at pilot sites.
- Confirm whether devices are company-owned or personal.
- Define email, SMS, WhatsApp or in-app notification preferences; external messaging is a later integration unless approved.
- Identify POPIA/privacy owner and required retention/deletion rules.
- Confirm incident-notification contacts.

13. Reports, dashboards and management questions

Proposed output	Business question	Client confirmation or correction
Operational heartbeat	What requires action today?	
Site-day completion	Which sites have completed attendance, safety and sync?	
Workforce exceptions	Where are attendance or assignment records incomplete?	
Payroll reconciliation	Do calculated totals match approved inputs?	
Asset readiness	Which assets are safe, compliant and available?	
Maintenance due	What is due by date or meter?	
Downtime and cost	Which assets consume the most repair cost or downtime?	
Compliance expiry	Which documents expire soon?	
Issue SLA	Which critical issues are overdue?	
Audit evidence	Who changed or approved a record?	

Decisions required

- Rank the five most important management questions.
- Provide examples of current weekly/monthly reports.
- Confirm reporting periods, site grouping and export formats.
- Confirm which values are actual, projected or targets.
- Define how asset readiness should be explained to leadership.

14. Imports, integrations and migration

Source/system	Proposed first-release treatment	Client confirmation or correction
Employee spreadsheet	Controlled CSV dry run and conflict report	
Asset spreadsheet	Controlled CSV dry run and identifier validation	
Payroll spreadsheet/system	Confirm export/import boundary	
Document folders	Selective upload with classification	
Telematics	Deferred pending coverage and ROI	
WhatsApp/email	Deferred or notification-only after approval	
Accounting/ERP	Confirm whether any system must receive outputs	

Information required

- Sample employee, site, asset, maintenance and payroll files with sensitive values removed where possible.
- Column definitions and examples for every import field.
- Known duplicate, missing or inconsistent data problems.
- Current systems, vendors and contract limitations.
- Required export consumers and formats.

15. Pilot, training and acceptance

Decision	Client response
Pilot sites	
Pilot asset classes and approximate asset count	
Pilot users and roles	
Training audience and preferred format	
Target pilot period	
Success measures	
UAT approvers	
Support contact and escalation	
Go-live decision authority	

Recommended success measures

- All pilot assets have at least one verified unique identifier.
- Daily site submissions are complete, attributable and recover from offline operation.
- Critical pre-start failures create traceable defects and work orders.
- No requester approves their own controlled action.
- Payroll totals reconcile to agreed source data.
- Every displayed management metric links to source records.
- Backup, restore and rollback procedures are rehearsed.

16. Final client feedback

Most important outcome Senatla Ops must achieve

Features or workflows that do not match Senatla Trading

Missing information, roles or processes

Risks or concerns before the pilot

Review confirmation

Reviewer	Decision	Signature/date
Mr Rubin Thoso	Confirm / Changes required / Further discussion
