

Senatla Ops

Artifact Register

Approved, engineering and superseded document and image artifacts.

VERSION	1.0
DATE	23 June 2026
STATUS	Controlled release baseline
CLASSIFICATION	Confidential - internal use

Prepared by Sankofa Digital Studio for Senatla Trading

Table of contents

Approved client-review artifacts	3
Engineering artifacts	3
Superseded or internal concepts	3
Generation and quality rules	3

Updated: 24 June 2026

Approved client-review artifacts

Artifact	Purpose	Status
output/pdf/Senatla-Ops-Client-Review-Pack.pdf	Ecosystem, role experiences, lifecycle and delivery discussion	Approved review pack; 10 pages
output/pdf/Senatla-Ops-Client-Requirements-Feedback-Template.pdf	Field names, workflows, authority and pilot decisions	Approved feedback workbook; 17 pages
docs/visuals/senatla-ops-ecosystem.png	Field-to-leadership ecosystem	Client-facing concept
docs/visuals/senatla-ops-role-experiences.png	Role-shaped application family	Client-facing concept
docs/visuals/senatla-ops-asset-lifecycle-story.png	Heavy-machinery lifecycle story	Client-facing concept

The visual boards communicate product intent and handoffs. They contain illustrative interface content and are not pixel-accurate implementation specifications.

Engineering artifacts

Artifact	Purpose
output/pdf/Sankofa-Senatla-Ops-Engineering-Handbook.pdf	Architecture, governance and release rules
output/pdf/engineering-asset-register-plan.pdf	Asset-register engineering plan
output/pdf/architecture.pdf	Architecture boundary
output/pdf/environments.pdf	Environment and secret boundary
output/pdf/testing.pdf	Verification layers
output/pdf/runbook.pdf	Release, rollback and incident operations
output/pdf/release-checklist.pdf	Production-candidate evidence

Superseded or internal concepts

senatla-ops-desktop-concept.png and senatla-ops-mobile-concept.png are early screen studies. They must not be sent as the current client ecosystem proposal. Retain only while useful for internal comparison; otherwise remove them through the artifact-cleanup issue.

Generation and quality rules

- Markdown is the editable source for narrative documents.
- Client-facing Markdown must have a matching PDF.

- Generated PDF and DOCX files must be reproducible through repository scripts.
- Render every PDF before release; check every page for clipping, overlap and trailing blank pages.
- Version, date and status must agree across source and generated artifacts.
- Do not commit credentials, personal data, production exports or unredacted client source spreadsheets.
